Current Portfolio

Ooredoo Myanmar Limited as Campaign Manager

Product Manager & Platform Capability Lead - Campaign Management System, Customer Value Management

Responsible all multi-channel Campaigns/promotions, segmented and open market promotions. Customer Onboarding, Handholding and Journey management via Campaigns and Communications.

- Revenue Upliftment and Conversion Ownership for running Campaigns
- Platform Capabilities, Investment Decisions, Campaign ROI, Margin and Budget alignment with senior Stakeholders.
- Differential Service management for High Value and Churn prone Customers.

Previous Projects

Vodafone Idea Limited as Senior Program Manager

Creating a Single Campaign Management Platform of Vodafone & Idea – Long-term (New System) and Sort-term (Migration) Solutions

I was responsible for the integration of Enterprise Campaign Management System at Vodafone India and Idea Cellular. The new System has to manage 415mn customers, this was one of the largest single instance Campaign management platform.

- IT Strategy and Planning for large Scale CRM and Digital Transformation Projects.
- Vendor Management, Governance and Deal/SOW Negotiations in projects under Analytic and Integration Vertical.

KPI Harmonization for Vodafone Idea Limited – Telecom Regulatory, Investors and Internal Reporting – MIS KPI Data Lake Creation

Idea Cellular and Vodafone India had their own reporting process. They have to report their KPIs to TRAI (Telecom Regulatory) and their respective Groups, based on multiple measures. Definition of most of the KPIs as basic as “Sales Reversal” were different for both of the companies.

- I was driving the IT Delivery and Solutioning for 1000+ Postpaid and Enterprise Business KPIs harmonization with Finance, Marketing and Sales team members.
- End to End Solution and Long term product Strategies involving Anchor (Going to Stay) IT Systems.
- Delivery and Hyper care for Telecom Regulatory, Aditya Birla Group and Vodafone Group MIS reporting; and their concerns.

Enterprise Campaign Management Platform and Pan India Rollout (22 Business units)

Summary – Cognitive Intelligence and Rules based Campaign marketing automation platform, which allows marketers to create micro segments, Cross Selling products and discounts on the fly. Communicate the offers using 13+ customer channels and track the Return of Investments.

- Wearing the hat of Program manager, Product Owner, Solution Design, Demand

Management and Service Delivery time to time.

- Completed the adoption and Team building in 22 circles. Sunset the Legacy Systems and Process. Cost Optimization.
- Was involved in the strategies for Product finalization, Deal Negotiations, Vendor Governance and billing.

Result/Impact – Revenue upliftment from segmented customers by 200%. Automation and Shared service outsourcing saves 200man days every month.

Postpaid & Enterprise Business – BI & Data warehouse

Summary – Created a Data warehouse from the scratch for Postpaid, Non-Mobility and Enterprise customers' data.

- Integrating 20+ postpaid IT components into the warehouse. (e.g. - Billing, Rating, Usage, CRM, Orders) into the Warehouse. Facilitating data marts and decision support systems.
- Integrating 15+ customer facing channels (e.g. - IN, USSD, Web, App, IVR, Emails) to understand the telecom customer better. Monetizing data and finding new revenue models. Resulting Increase in campaign efficacy.
- Segmentation & Modeling for Quality Customer acquisition, Churn reduction, Fraud Monitoring, Revenue upliftment and Margin per user.
- Helping finance team to calculate customer wise postpaid unbilled rental, ROI, and net revenue apportioned under all legs based upon multiple rule audited by top auditors on daily basic.

Result/Impact – Automating the entire revenue booking efforts for PAN India finance teams reduced manual reporting errors and efforts from 100 man days to 10 man days every month.

Previous Projects

Capgemini Consulting as Consultant

FATCA Compliance Solution for Barclays Bank Group – Wealth & Retail Banking

- End to End Compliance Solution for Foreign Account Tax Compliance Act – Reporting – ETL – Acquire and Publish – Data Modeling – IRS Reporting.
- Barclays Sources Included alignment with Operations center of United Kingdom, United States, Spain, Portugal and Altamira, France, Barclay Card, Absa (South Africa)

ETL and Reporting migration for Morgen Stanley – Investment Banking

- Worked on multiple ETL and Reporting migration projects – Informatica to Ab Initio and Cognos to Business Objects Migrations.
- Completed the journey of Informatica ETL Developer to Team lead to Project Delivery SPOC. I was the lead for a team of 7.
