- IT Solution architect for all the use cases, requirements, and new integrations with new consumer channels.
- Manage marketing campaigns scheduling by negotiating priorities. Coordinate the maintenance and development of Campaign Management System.

Selected Previous Projects

Vodafone Idea Limited as Senior Program Manager

Creating a Single Campaign Management Platform of Vodafone & Idea – Long-term (New System) and Sort-term (Migration) Solutions

During the time of Vodafone and Idea Cellular merger in India. I was In-charge for **integrating the existing Campaign Management Systems** in the two companies.

Without impacting the current business process and campaigns the new System has to manage 415mn customers, this was one of the **largest single instance Campaign management** platform implementations in any telecom company.

- As part of core Integration teams, I was actively involved in Product evaluation, business process finalization, platform investment roadmaps.
- Aligning with business and technology teams to close the **Scope of work (SOW)**, for releasing **Request for Proposal Document** (RFP).
- We evaluated 4 products and vendors for platform and managed services deal, keep the current architecture and IT Infra in mind for both companies.
- Multiple Vendor Evaluation Governance and Deal/SOW Negotiations in projects under Analytic and Integration Vertical.
- Creating a new digital product catalogue to be used in Campaigns by merging the IT product portfolio for 22 circles in both companies.
- SLAs, timelines, and billing negotiations with existing vendors for pre-merger and post-merger scenarios.

Selected Previous Projects

Vodafone Idea Limited as Senior Program Manager

KPI Harmonization for Vodafone Idea Limited – Telecom Regulatory, Investors and Internal Reporting – MIS KPI Data Lake Creation

Idea Cellular and Vodafone India had their own reporting process and KPI definitions. Both Organizations had to report their KPIs to TRAI (Telecom Regulatory) and their respective Groups.

Definition of most of the KPIs as basic as “Sales Reversal” were different for both companies.

- I was driving the IT Delivery and Solutioning lead for **500+ Postpaid and Enterprise Business KPIs** harmonization with Finance, Marketing and Sales team members.
- Created End to End Solution and Long-term product Strategies involving Anchor (Going to Stay) IT Systems.
- Handled Delivery and Operations for Telecom Regulatory, Aditya Birla Group and Vodafone Group MIS reporting, and their concerns.

Enterprise Campaign Management Platform and Pan India Rollout (22 Business units)

Summary – Cognitive Intelligence and Rules based Campaign marketing automation platform, which allows marketers to create micro segments, Cross Selling products and discounts on the fly. Communicate the offers using 13+ customer channels and track the Return of Investments.

- Wearing the hat of Program manager, Product Owner, Solution Designer, time to

time, completed the adoption and team building in 22 circles. Closing the Legacy Systems to achieve the cost optimization.

- I was also involved in the strategies for product finalization, deal negotiations, vendor governance, and milestone billing.

Result/Impact – Revenue upliftment from segmented customers by 200%. Automation and Shared service outsourcing saves 200man days every month.

Postpaid & Enterprise Business – BI & Data warehouse

Summary – Created a Data warehouse from the scratch for Postpaid, Non-Mobility and Enterprise customers' data.

- Integrating 20+ postpaid IT components into the warehouse. (e.g. - Billing, Rating, Usage, CRM, Orders) into the Warehouse. Facilitating data marts and decision support systems.
- Integrating 15+ customer facing channels (e.g. - IN, USSD, Web, App, IVR, Emails) to understand the telecom customer better. Monetizing data and finding new revenue models. Resulting Increase in campaign efficacy.
- Segmentation & Modeling for Quality Customer acquisition, Churn reduction, Fraud Monitoring, Revenue upliftment and Margin per user.
- Calculating Daily customer wise postpaid unbilled rental, ROI, and net revenue apportioned under all legs based upon multiple audited rules.

Result/Impact – Automating the entire revenue booking efforts for PAN India finance teams reduced manual reporting errors and efforts from 100-man days to 10-man days every month.

Selected Previous Projects

Capgemini Consulting as Consultant

FATCA Compliance Solution for Barclays Bank Group – Wealth & Retail Banking

- Compliance Solution for Foreign Account Tax Compliance Act – Reporting – ETL – Acquire and Publish – Data Modeling – IRS Reporting.
- Led the alignment with Operations center of United Kingdom, United States, Spain, Portugal and Altamira, France, Barclay Card, Absa (South Africa)

ETL and Reporting migration for Morgen Stanley – Investment Banking

- Led ETL and Reporting migration projects – Informatica to Ab Initio and Cognos to Business Objects Migrations.
- Started my journey as Informatica ETL Developer, for migration projects in the Bank.

Digital Enablement Advisory and Consulting – Naandi Foundation

I was Part of Capgemini India's 12 members team, who worked with Naandi Foundation to build a system for the people involved with Naandi and work together as one team across borders to improve child education in rural India.
