#1 Consulting
With Capgemini Consulting, I Started with Strategic and Management Consulting focused on Analytical and Digital Solutions to IT and Business Customers.

#2 Delivery
With Idea Cellular, I have learned the project delivery. Managed delivery partners and consultants – alongside telecom technologies and process.

#3 Business
With Ooredoo Myanmar, I am managing the Business side of those platforms, which I have advised and delivered earlier during my consulting and delivery days.

Vodafone Idea Limited, formerly Idea Cellular Limited (Dec 2015 – Feb 2019)

Senior Program Manager – Corporate, IT Program Management – Pune & Mumbai

INTERSETING PROJECTS & MILESTONES –

1. Integrating and Creating a Single Campaign Management Platform of Vodafone & Idea – Long-term and Sort-term Solutions

Responsible for the merger of the Enterprise Campaign Management System for Vodafone and Idea Cellular jointly, with a scale to manage 400mn customers. One of the largest Campaign management platform for any telecom player.

- IT Strategy and Planning for large Scale CRM and Digital Transformation Projects.
- Vendor Management, Governance and Deal/SOW Negotiations in projects under Analytic and Integration Vertical.

2. KPI Harmonization for Vodafone Idea Limited – Telecom Regulatory, Group and Internal Reporting and MIS Data Lake Creation

Idea Cellular and Vodafone India had their own reporting process. They have to report revenues and usages to TRAI and their respective Groups, with the predefined KPI, based on multiple measures. Definition of a KPIs as basic as “Sales Reversal” was different for both of the companies.

- I was driving the IT Delivery and Solutioning for 1000+ Postpaid and Enterprise Business KPIs harmonization with Finance, Marketing and Sales Stakeholders.
- End to End Solution and Long term product Strategies involving Anchor (Going to Stay) IT Systems.
- Delivery and Hyper care for Telecom Regulatory, Aditya Birla Group and Vodafone Group MIS reporting; and their concerns.

Experience

Second Organization

PRODUCT OWNERSHIPS –

3. Enterprise Campaign Management Platform and its Pan India Rollout (22 Business units)

Summary – Cognitive Intelligence and Rules based Campaign marketing automation platform, which allows marketers to create micro segments, Cross Selling products and discounts on the fly. Communicate the offers using 13+ customer channels and track the Return of Investments.

- Wearing the hat of Program manager, Product Owner, Solution Design, Demand Management and Service Delivery time to time.
- Completed the adoption and Team building in 22 circles.
- Sunset the Legacy Systems and Process. Cost Optimization.
- Was involved in the strategies for Product finalization, Deal Negotiations, Vendor Governance and billing.

Result/Impact –Revenue upliftment from segmented customers by 200%. Automation and Shared service outsourcing saves 200man days every month.

4. Postpaid & Enterprise Business – BI & Data warehouse

Summary – Created a Data warehouse from the scratch for Postpaid, Non-Mobility and Enterprise customers' data.

- Integrating 20+ postpaid IT components into the warehouse. (e.g. - Billing, Rating, Usage, CRM, Orders) into the Warehouse. Facilitating data marts and decision support systems.
- Integrating 15+ customer facing channels (e.g. - IN, USSD, Web, App, IVR, Emails) to understand the telecom customer better. Monetizing data and finding new revenue models. Resulting Increase in campaign efficacy.
- Segmentation & Modeling for Quality Customer acquisition, Churn reduction, Fraud Monitoring, Revenue upliftment and Margin per user.
- Helping finance team to calculate customer wise postpaid unbilled rental, ROI, and net revenue apportioned under all legs based upon multiple rule audited by top auditors on daily basic.

Result/Impact – Automating the entire revenue booking efforts for PAN India finance teams reduced manual reporting errors and efforts from 100 man days to 10 man days every month.

Footnotes

I advocate that UX is not only about the times when people are using our products/services, but also about the times when they are not. In the era of ever-vibrating smartphones and increasingly demanding apps, there is no better user experience than peace of mind. A random promotional email, unwarranted App notification give another reminder to your user to uninstall your App.

Warren Buffett once quoted that the Difficulty lies not in New Ideas, but in escaping from the Old ones. I am trying to address the same philosophy as big things are always simple.

I am a firm believer that we can't innovate the products without first innovating the way we build them. Airbnb, Uber, Zomato, Amazon, Tesla, Netflix are some of the products I admire.

If you have something interesting for me lets connect.
Cheers' Anurag
